

10/11

▼ COntersation with Hannah

- Turn it on
 - read out time left 00:00
 - Right temp read out, not on
- set time
 - 1 toggle to move between hours and minutes (set)
 - 2 arrows to increase and decrease
 - hour increment 1
 - Minutes increments of 30 min
- Press on/off button
 - it will start sonicating and go to temp on its own
 - Read out real time temp
 - 60C max
- time runs out
 - Relays audibly De-activate
 - Time readout stops shortly after
 - Time readout is back to 00:00
 - Nothing to indicate it's done
- if more time needed
 - If press (set) then previous time interval will be remembered
 - Then new interval can be changed and set
- Level indicator lights
 - water level prohibits it from turning on

- Will still let you set the time
